November 6, 2013

Dr. Kenneth Akey and his office focus on caring not just treating. His approach is holistic and strives to educate families about health of their infants, children and adolescents, including transitions as the family grows. A strong advocate of breastfeeding and healthy nutrition, along with support of parents that desire alternate vaccine scheduling make him an asset to our community.

As a nurse-midwifery practice it is important to have pediatric care that is personal and individualized, is not critical of choices that parents make, provides comprehensive care and shares in the philosophy of joint decision-making. Our families have been thrilled with the caring style of Dr. Akey and that is why he is highly recommended by Beach Cities Midwifery and Women's Health Care.

Sincerely,

B. J. Snell, PhD, CNM, FACNM

Director, Beach Cities Midwifery & Women's Health Care
